Picture a day receiving legible and complete prescription orders.

Picture yourself editing an order that automatically corrects your facility's MAR.

Picture orders delivered with convenient audit trails and delivery manifests.

Picture facility staff effortlessly managing med passes.

You're united with your facilities. Your business grows, operating costs decline and profits soar. **Above all, you've built a bond that improves resident care.**

You get the picture. **Now make the difference.**
TOCCARÉ Medication Management suite.

TOCCARÉ
MEDICATION MANAGER

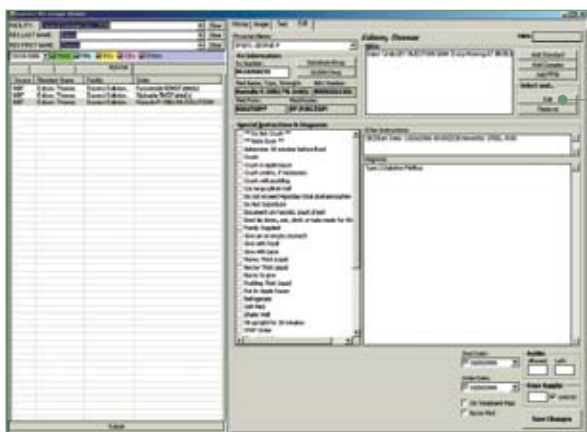

How much time do you and your facility staff spend ...

- on the phone and in front of the fax machine, processing orders and reworking flawed ones?
- transcribing from paper to computer?
- keeping MARs current?

Should you and your facilities suffer...

- month-end MAR reviews?
- the hassle of delivery manifests?
- anxiety over the status of orders?

Enter TOCCARÉ. Designed for both the pharmacy and the facility, **TOCCARÉ** not only automates prescription order management, but also integrates it with pharmacy billing and facility inventory. **It's a seamless system of communication that can make a real difference—uniting you, your facilities, and, ultimately, their residents.**

Improve efficiency and accuracy

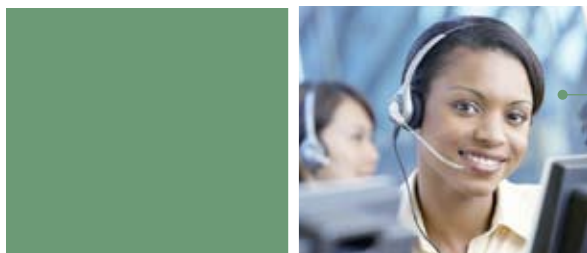

TOCCARÉ manages it all – from processing and billing orders to recording delivery receipt and audit trails.

View order history and deliver on time with online order submission, priority-driven order queues and script images.

Reduce data entry and order processing time, errors and stat orders with auto refills, DCs and an integrated order management/billing system.

Eliminate paperwork with automated delivery manifest tracking and archiving.

Eliminate MAR printing and pare down phone calls and missed orders with order status updates and two-way communication between you and your facilities.

Deploy technology with ease

We take care of setup, MAR conversion, support and training. If questions do arise, our support call center is available every day, around the clock.

Enhance resident care and safety

Deploy **TOCCARÉ** at your facilities and you'll be able to edit their MARs—directly from your pharmacy. That means more accurate orders and med passes, and a reduced risk of missed meds and errors. It also means facility staff enjoy an intuitive, paperless system that frees them from a time-consuming and error-prone manual process, reinforcing best practices and allowing more time for resident care.

Build your business

Set your business apart with stellar service and the flexibility to adapt to industry changes. **TOCCARÉ** gives you the tools to redefine your role as a service provider.

"We installed TOCCARÉ, and in just three months we saw our business grow by 15%. We are now on track to grow by 60% this year thanks to Daverci Solutions."

—Julie Walters, RN, Pharmacy Manager, Care Apothecary

Giving facility staff the right tools and training is key to their ability to provide premium resident care. **The TOCCARÉ medication management suite takes the stress off facility staff and puts the focus on your residents.**

Put the passion back in resident care

Help facility staff practice their passion. With TOCCARÉ, they won't have to worry about paperwork and process. The facility-friendly touchscreen walks them through med passes and orders, saving time and reducing errors.

Ensure clean, accurate and fast med passes with **TOCCARÉ's** convenient handheld.

Rest assured that meds are ordered and delivered on time and stat orders reduced with auto refills, PRN counts, wasted meds tracking and an inventory management system.

Eliminate month-end MAR reviews, streamline med passes and focus more on your residents with electronic med passes and real-time MARs.

Reduce phone calls and order stat notifications and improve MAR accuracy with two-way communication between you and your pharmacy.

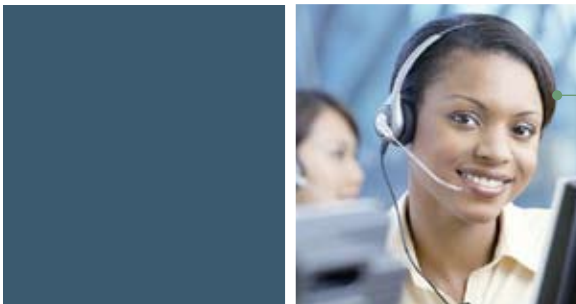

Provide a personal touch

Give your residents and their families peace of mind knowing you're in touch with their individual needs – from meds to daily living activities.

Streamline operations and compliance

TOCCARÉ puts administrators in touch with industry best practices. Use customized reports to chart facility workloads, analyze outcomes assessments, review med-pass productivity and stay on top of state and federal regulations.

Adopt technology with ease

We take care of setup, MAR conversion, support and training. If questions do arise, our support call center is available every day, around the clock.

Trim staff training time, reinforce best practices and focus on resident care with facility-friendly touch screen.

Improve accuracy of orders and med passes with **TOCCARÉ's** touchscreen simplicity.

“We’re saving 30 minutes off major med passes thanks to TOCCARÉ.”

—Cory Meyer, Campus Manager, Heritage Senior Homes/Volunteers of America

The TOCCARÉ Medication Management Suite

At the Pharmacy

- Automates order entry. Facility orders are electronically submitted into your pharmacy billing system.
- Allows editing of facility MARs directly from your pharmacy.
- Facilitates two-way communication between pharmacy and facility.
- Automatically submits refills.
- Allows facilities to maintain their own MARs —no more printing!
- Automates an audit trail of the delivery manifest.
- Reduces stat orders.

At the Facility

- Maintains accurate and current MARS.
- Automates medication administration, prescription order entry and refills.
- Tracks narcotics usage.
- Eliminates month-end MAR review.
- Provides bar-coded med administration and receiving.
- Provides order status information.
- Accelerate med passes.
- Submits orders to the pharmacy reliably.
- Uses fingerprint logins to digitally sign MARs.

“No other system offers the attention to both the pharmacy and the facility that TOCCARÉ does.”

—Doug Sprinkle, General Manager, Brookcare

The TOCCARÉ difference

A system for both the pharmacy and the facility,
designed to adapt to your workflow

Full support

- We install the equipment, input pharmacy and facility records, configure secure Internet and wireless connections, and fully train staff
- Technical assistance, 24/7
- Remote monitoring and management of data
- Continuous data backup for recovery

Security

- System exceeds HIPAA guidelines to protect medical info
- Fingerprint sensors at facilities ensure only authorized users access to resident and ordering data

Reliability

Client-server based solution is not dependent on a continuous Internet connection. Applications and data exist locally. Should Internet connectivity go down, pharmacy and facility staff can continue working until connectivity is restored. Orders stay in the queue; the system processes them when it's back online.
